Time: 11am-2pm

Mode: Online

Registration Fee:

Category	Registration Fee
General Participant	₹99
Promotional Collaborator	₹299
Institutional Collaborator	₹999
Foreign participants	\$25
Invited participants/speakers	Nil

Program Idea:

E20 petrol is now becoming the standard fuel in India. The nationwide adoption of E20 petrol has sparked widespread discussion among vehicle owners, experts, and policymakers. Many vehicle owners still have questions about its real impact. Will it improve fuel efficiency? Is it safe for older cars and bikes? Can it affect engine life, maintenance costs, or emissions? This talk show will present a balanced, logical analysis of both the advantages and potential challenges of E20 fuel. Whether you are a car owner, biker, student, engineer, or simply a responsible citizen, this session will help you make informed decisions about E20 fuel and understand its environmental, economic, and technical implications. Join the discussion and stay informed.

Anyone interested can attend the program.
